

AMENDMENTS TO THE CLAIMS

Please amend the claims as follows.

1. (Currently Amended) A portal for a broadcast digital television system comprising a remote terminal connected via a communications network to a broadcast center, the portal comprising:

a display connected to the remote terminal for displaying a plurality of pages, wherein each page of the plurality of pages comprises an arrangement of cells, each cell comprising a visual object and an underlying application that is launched from behind [[the]] each cell and is displayed upon user selection of [[the]] each cell;
and

a user input device for ~~inputting user inputs to~~ selecting one cell of the arrangement of
cells,

wherein each page of the plurality of pages is dynamically reorganized based on a content of the arrangement of cells on each page,

wherein ~~at least one~~ a first cell of the arrangement of cells displays one of a plurality of
programs received from the broadcast center, ~~[[and]]~~

wherein ~~at least one~~ a second cell of the arrangement of cells is sensitive to the context of
[[a]] the first cell displaying [[a]] the one program, and

wherein a third cell of the arrangement of cells is generated for a specific period of time
corresponding to a length of at least one of the plurality of programs being
displayed on another cell of the arrangement of cells.

2. (Original) The portal according to claim 1, wherein the cells include one or more dynamically changing cells.

3. (Canceled)

4. (Currently Amended) A method of generating a portal for a communications system, comprising:

receiving a plurality of broadcast programs; and

generating a portal comprising:

a plurality of pages configured to display a plurality of cells;

[[a]] the plurality of cells containing live video of at least some of the received programs, wherein at least one cell of the plurality of cells comprises a visual object and an underlying application that is launched from behind the at least one cell and is displayed upon user selection of the at least one cell; and
~~at least one further~~ a first cell of the plurality of cells associated with an application whose function is dependent on the context of a second cell containing live video; and
dynamically reorganizing at least one page of the plurality of pages based on a content associated with the plurality of cells on the at least one page,
wherein a third cell of the arrangement of cells is generated for a specific period of time corresponding to a length of at least one of the plurality of broadcast programs being displayed on another cell of the plurality of cells.

5.-10. (Canceled)
